IOWA BIRD LIFE IOWA ORNITHOLOGISTS' UNION

The Iowa Ornithologists' Union, founded in 1923, encourages interest in the identification, study, and protection of birds in Iowa and seeks to unite those who have these interests in common. Iowa Bird Life and IOU News are quarterly publications of the Union.

OFFICERS OF THE IOWA ORNITHOLOGISTS' UNION (Dates indicate end of current term): President: Paul O. Roisen (2013), 4420 3rd Ave, Sioux City, IA 51106 (roisenp1950@yahoo.com) Vice President: Tom Schilke (2013), 1432 Liberty Ave, Waterloo, IA 50702 (Tom.Schilke@gmail.com) Secretary: Stuart Sparkman (2014), 3925 Hillcrest, Des Moines, IA 50310 (kingbird@mchsi.com) Treasurer: Mary Beth Hunt (2014), 1201 High Avenue West, Oskaloosa, IA 52577 (birders@mahaska.org and (iou@mahaska.org)

DIRECTORS: Don Brown (2013), Keith Dyche (2013), Jay Gilliam (2014), Dennis Thompson (2014), Karen Viste-Sparkman (2014)

JOURNAL STAFF:

Editor: Stephen J. Dinsmore, Dept of Natural Resource Ecology and Management, 339 Science II, Iowa State University, Ames, IA 50011 (cootjr@iastate.edu)

Book Review Editor: James J. Dinsmore, 646 Mallory Hill Drive, The Villages, FL 32162 (oldcoot@iastate.edu)

Christmas Bird Count Editor: Christopher J. Caster, 1813 Liberty Lane, Coralville, IA 52241 (cjcaster@q.com)

Field Reports Editors (Enter seasonal data at <www.iowabirds.org>.):

Winter (Dec, Jan, Feb; deadline 3 March): Francis L. Moore, 336 Fairfield Street, Waterloo, IA 50703 (flmoore@forbin.net)

Spring (Mar, Apr, May; deadline 3 June); Vacant (contact editor if interested)

Summer (Jun, Jul; deadline 3 August): *James J. Dinsmore*, 646 Mallory Hill Drive, The Villages, FL 32162 (oldcoot@iastate.edu)

Fall (Aug, Sept, Oct, Nov, deadline 3 December): Paul Hertzel, 1432 East State Street, Mason City, IA 50401 (phertzel@rconnect.com)

History Editor: Thomas H. Kent, 624 Larch Lane, Iowa City, IA 52245 (thkent@gmail.com)

STANDING COMMITTEES AND CHAIRPERSONS:

Library/Historical: Hank Zaletel (2011), 1928 6th Street, Nevada, IA 50201 (madowl@midiowa. net); Richard Trieff

Membership: Douglas Harr (2014), PO Box 117, Ogden, IA 50212 (dharr@netins.net); Karen Disbrow (2014); Rick Hollis (2017); Paul Skrade (2017)

Records: Ann M. Johnson (secretary, appointed by committee), 5362 120th Avenue, Norwalk, IA 50211 (aj@hologrambirds.com); Aaron Brees (2015); Chris Edwards (2014); Jay Gilliam (2017); Rita Goranson (2012); Matthew C. Kenne (2016); W. Ross Silcock (2013)

Meet an Iowa Birder—Mary Lou Petersen

Jo Ann Whitmore

Mary Lou Petersen birding at Buckshot M, Appanoose, 17 October 2009. Photograph by Jo Ann Whitmore.

Mary Lou Petersen insists that she had no intention of becoming a birder, that she was interested in laboratory sciences not outdoor sciences. She will tell you that her destiny was preordained by the fickle finger of fate, that the last semester of college and her first year teaching were under the control of the cosmos not hers. Mary Lou wanted to take a certain math course that last semester at Iowa State Teachers' College. However, it was at the same time as a four credit biology class that she wanted. She needed a four credit biology course and the only other biology available was Dr. Grant's four credit field zoology of vertebrates. She opted for the math class knowing that field zoology was going to be trouble. Dr. Grant was a dedicated chauvinist and she was a feminist before there was a women's movement. Two of the field trips during the field zoology course were led by Peter Petersen. She wasn't impressed.

During that semester there were job interviews to go through. She did not want to leave northern Iowa, or go to one of Iowa's more populated areas. But, how could she turn down a job at one of Iowa's premier small school districts that was offered to her when she hadn't even applied for it? The first day of teacher in-service, the head of the science department casually mentioned to the industrial arts teacher that she had taken an ornithology class. The teacher and his wife were birders and insisted on taking her to Tri-city Bird Club. There she ran into Peter again and the rest is history.

Mary Lou was born in Waterloo in 1939, and lived in Cedar Falls from 1944 to 1961. She was the daughter of John and Lou Petersen. She went to school in Cedar Falls K-12. In 1961, she received her bachelor's degree from Iowa State Teachers' College in the last class that the institution used that name. In 1967, she received a MNS (Master of Natural Sciences) from the University of South Dakota. She accepted a position as a junior high school science teacher in Pleasant Valley Township School District that began in the fall of 1961. It was the district's first junior-senior high school building and 1962 would be the first graduating class from Pleasant Valley. At the time the district was small, a tax hedge for Alcoa, and

had existed only since the one room school houses were closed in 1953. She remained in the school district until her retirement in 1997.

Mary Lou and Peter married in August 1962. Her students accepted the change of name from Miss Petersen to Mrs. Petersen quite easily. However, a number of the parents were confused. Peter was editor of *Iowa Bird Life* at the time and an active bird bander. He was working at Crescent Macaroni and Cracker Company. He visited the nets to band the birds four times a day, before work, at noon, after work and at dusk. Mary Lou often accompanied him on the last check.

Mary Lou was a young bride of less than a year when Peter's undeserved

Mary Lou Petersen (right) with Jon Dunn at the fall IOU meeting, Centerville, 17 October 2009. Photograph by Jo Ann Whitmore.

faith in her cooking ability caused him to invite the first big name birding personality to their house for dinner. Jim Fowler, co-host of Marlin Perkins' Wild Kingdom television show, ate with them before a program he was giving at the Masonic Temple in Moline, Illinois. Jim needed to be in Chicago the next day. The night was treacherous with rain and sleet. Streets and roads were hazardous, so Jim slept on an air mattress in the second bedroom because the couple had only one bed. He said that he slept well and had slept in much worse situations.

Over the years there were other well known personalities who dined at their home. Dr. Walter Breckenridge, director of the Bell Museum at the University of Minnesota and his wife. Dr. Breckenridge was an ecologist, ornithologist, and a fine bird artist. The couple purchased two of his paintings early in their marriage. Mary Lou also taught two of his grandchildren who went through Pleasant Valley schools. Dr. Olin Sewell Pettingill and his wife had dinner at Peter and Mary Lou's home before he gave an Audubon Screen Tour lecture. Dr. Pettingill was a professor at Carlton College in Minnesota and at the University of Michigan's Biological Station. He was Director of the Cornell Laboratory of Ornithology for many years. Dr. Pettingill won some of the highest honors given in the field of ornithology. Possibly the most well-known of all of the eminent ornithologists to be entertained by Peter and Mary Lou was Dr. Roger Tory Peterson and his wife. He too was in the Quad Cities to present an Audubon Screen Tour lecture. Following the meal, Peter had Dr. Peterson autograph all of the books they had that he had written. When Peter pulled out Mary Lou's old Peterson's field guide she was a little embarrassed by its condition. Dr. Peterson told her that he liked to sign books like hers because it showed it had been well used.

Early in the 1960s, a mother called the house when Peter was not at home. She lived in California and said that her young son was very interested in birds and wanted to know if Peter was netting. Mary Lou told her that Peter had recently put up the nets for the fall. The mother said that her son was coming to Davenport to visit his grandmother and she

wondered if Peter would allow him to go with him to the nets. Mary Lou assured her that he would. Less than a week later the boy arrived and made arrangements to go to the nets with Peter. The youngster was Jon Dunn, editor with Jonathan Alderfer of the *National Geographic Field Guide to the Birds of North America*, fifth edition. He spent hours at the nets while Peter was at work. He told Mary Lou at the 2009 fall meeting of IOU that he learned his eastern warblers at Peter's nets.

Peter loved to travel and Mary Lou frequently traveled with him during the summers when school wasn't in session. She has traveled on four continents and visited 49 of the 50 states. Peter traveled more extensively as he could travel when Mary Lou had to be in school. Following cancer and subsequent cancer treatment, travel became difficult for her and she has not traveled much since.

Peter's terminal cancer was found in December of 1996. He was determined to put up the fight of his life, but he was realistic and at the 30th Anniversary of Bald Eagle Days in the Quad Cities, he cornered Tom Dunstan, professor of ornithology at Western Illinois University. Tom had been a graduate assistant in a class that Mary Lou took at the University of South Dakota. Peter asked Tom if Western Illinois University wanted his banding records and the years of nearly daily bird observations on field cards. Peter added the caveat that to get the field records Western Illinois University also needed to accept his library. A few weeks later Tom notified Peter that the university was willing to accept all the ornithological records and his library and banding equipment.

On 12 July 1997 Peter died. In the days that followed the thought occurred to Mary Lou that birding might well be a thing of the past. Peter was not there to go birding with her. She had retired from teaching, so she would not be taking students birding. Most of the birders she knew were not retired and had jobs and family obligations. She realized that the weeks she taught about birds in her classes at Pleasant Valley would no longer be in the curriculum. She did not express these doubts to anyone. Ann Barker might have sensed that Mary Lou needed encouragement to go birding. At the end of July she called her to say that she and Walt Zuurdeeg were taking her birding on Saturday. Mary Lou went birding that day. The pleasure of birding was still there. It was different without Peter, but it was there. He wasn't there for her to say "What bird call was that Peter?" She realized she had to improve in that area.

Weeks passed and she found a friend, Jean Deere, in her bereavement group, who was retired and could go birding with her. There were always the Audubon field trips and she was often with Cathy Konrad. Seven years after her retirement she realized that Joan Fisher and I had retired and we became part of her birding group. Carol Rogers retired and also joined the group of women who birded. Mary Lou has been Quad City Audubon's field trip leader for many years. She has been asked by teachers to give lessons on birds. For the last fifteen years, Mary Lou has run one of Peter's five Breeding Bird Survey routes, which she is passing on to Dick Sayles next year. It has becoming difficult for her to get in and out of the car fifty times, and it was taking more time to get the route completed. She completed fifty straight Quad City Christmas counts and forty-six Muscatine Christmas counts. She may not have intended to become a birder, but she is happy that she did.

3603 37th Avenue, Moline, IL 61265 (jwhitmore3603@gmail.com)

Iowa Christmas Bird Count, 2011–2012

Chris Caster

A total of fifty-one counts were held this season, the same number as last. The NW Clayton County CBC returned after a four year absence and a new count was added centered on Canton, South Dakota. Missing from last year were Sac County and Cherokee.

Although Iowa saw subzero temps in early December, the CBC period was exceedingly mild. According to the State Climatologist, temperatures reached into the 50s on ten days between the 14th and 31st. Only three counts reported any snow cover, the most being 2 inches at NW Clayton County on the 23rd. Reported temps reached a high of 66 at Lamoni on the 31st.

The species count this season was 145, which crushed the previous high of 142, and sits well above the 10-year average of 136 species. The total number of birds (574,166) was also well above the 10-year average. Congratulations to Davenport for attaining the high species count of 91 this season. Other high counts included Keokuk (87), Burlington and Saylorville (85), Clinton (82), Green Island (81), and Shenandoah (77). Spirit Lake (58) led the northern counts. The average count this year had 13 field observers, 6 field parties, and found 57 species.

REGULAR SPECIES

Sixteen regular species were found in record numbers this season. Groups present in good numbers included waterfowl, raptors, shrikes, sparrows, and blackbirds. Frequently reported species are recorded in Table 2. Species found on three or fewer counts are recorded in Table 3.

It was a record year for Greater White-fronted Geese (1,368) with 750 at Muscatine and 370 at Keokuk. Snow Geese (917) were present on fifteen counts. Five-hundred were at Lamoni, 180 were at DeSoto NWR, and 164 were at Muscatine. Ross's Geese (6) were reported on four counts. Cackling Geese (3,200) were again at record numbers. Canada Geese (154,811) were present in near record numbers. Exceptional numbers were at Cedar Falls-Waterloo, Sioux City, and Spirit Lake. Trumpeter Swans (400) were found in record numbers with 145 at SE Webster County. Tundra Swans (1,082) were also at record numbers with 722 at Clinton and 348 at SE Clayton County. Single Mute Swans were at Iowa City and Marshalltown. Dabbling ducks numbers were generally the best in five years. Northern Shovelers (255), Northern Pintails (146), and Greenwinged Teal (347) had their best year in ten.

Canvasbacks (55,324) rebounded from a decade low to record numbers. However, other divers posted more average numbers. Notable were Bufflehead (225) which had their best numbers in a decade. Common Mergansers (2,676) rebounded slightly from a 20-year low. Red-breasted (18) and Hooded (134) mergansers were a bit above average. Ruddy Ducks (2,129) had their best season in a decade. Six Surf Scoters was a near

record and six White-winged Scoters tied a previous high. Two Long-tailed Ducks were at Burlington and a count week bird was at Keokuk.

Gallinaceous birds did not count well. Gray Partridge (13) were only found on three counts. Ring-necked Pheasants (197) were at their lowest number in at least 25 years. Even Wild Turkeys (1,959) were below average. Decorah had the only Ruffed Grouse. Northern Bobwhites (45) were about half their average; 24 were at Shenandoah and 15 were at Rathbun.

Six Common Loons were found on four counts, three at Red Rock. This was the most in a decade. Pied-billed Grebes (8) were average. American White Pelicans (186) were in very good numbers at Muscatine and Red Rock although Double-crested Cormorants (26) were below average. Great Blue Herons (200) were found in good numbers on Mississippi River counts. Fifteen at Wapello County was high elsewhere.

Bald Eagles (2,845) were below average. Perhaps the warm temperatures allowed them to remain further north. Northern Harriers (148) were the highest since 1994-95. Sharp-shinned Hawks (56) were below their average, but Cooper's Hawks (98) were above. Red-shouldered Hawks (15) tied their high. Red-tailed Hawks (2,221) were in record numbers, but Rough-legged Hawks (93) were well below their average. An astounding 14 Golden Eagles were found for a new high. They average closer to four a season. American Kestrels (662) were in good numbers and Merlins (19) also set a new high. Three Peregrine Falcons were found, one in Davenport and two in Cedar Rapids.

American Coots (936) had their best year in a decade. Killdeer (29) were in fair numbers while Wilson's Snipes (14) were harder to find. Ring-billed Gulls (21,108) had their best year in five, but Herring Gulls (675), although widespread, were not abundant. Thayer's Gulls (5) were found on three counts. Lesser Black-backed Gulls (3) were at Andalusia, Cedar Rapids, and Red Rock. They have been found on each of the last five counts and three birds was a new high. Glaucous Gulls (9) were at near record numbers.

Rock Pigeons (13,233) were again at near record numbers. Eurasian Collared-Doves (751) posted a new high; Boone County had ninety. By contrast, Mourning Doves (2,598) had their lowest count in a decade.

Eastern Screech-Owls (140) had their second highest count in 20 years. Kudos to Rathbun for locating nineteen. Great Horned Owls (209) were found in above average numbers and Barred Owls (204) were in near-record numbers. Long-eared Owls (28) were scarce again this year. Short-eared Owls (3) had their lowest count in eight years. After only two birds last season, Northern Saw-whet Owls (19) were found in record numbers.

Belted Kingfishers (154) had their best count in five years. Red-headed Woodpeckers (158) fell well below their 10-year average of 245. Yellow-bellied Sapsuckers (26) and Northern Flickers (603) were both below average. On the other hand the numbers of Red-bellied, Downy, and Hairy Woodpeckers bested their averages, and seem to do so by a small margin nearly every year. Pileated Woodpeckers (143) set a record high and their average has also increased with each count.

Northern Shrikes (92) were at near-record numbers. They were even found on four counts in the southern third. Loggerhead Shrikes (5) were average. Blue Jays (4,109)

were also average. American Crows (40,615) posted their lowest numbers in more than twenty years. Black-capped Chickadee (8,229) numbers were well above average, as were Tufted Titmice (821). Horned Larks (442) had their lowest count in nine years, as did Red-breasted Nuthatches (45). White-breasted Nuthatches (3,612) and Brown Creepers (424) were both found in very good numbers. Carolina Wrens (83) were somewhat below average, but Winter Wrens (45) were in near-record numbers. Golden-crowned Kinglets (68) numbers were down somewhat, but they also fluctuate greatly from count to count. Seven Ruby-crowned Kinglets was well above average.

Eastern Bluebirds (832) numbers were good. Hermit Thrushes (19) were scarce considering that nine of those were at Green Island alone. American Robins (2,131) were well below average, but they are another bird whose count numbers fluctuate greatly from year to year. Northern Mockingbirds (6) were reported from 3 counts. Four were at Lamoni. Three Brown Thrashers was average. Cedar Waxwings (3,634) were slightly below their average. Yellow-rumped Warblers (97) were abundant. European Starlings (48,215) were somewhat below average; Davenport had the high-count with 2,820.

Sparrow numbers were mixed. Eight towhees was a very good total. Five of those were Spotted Towhees; DeSoto NWR and Shenandoah had two apiece, and Sioux City had one. Eastern Towhees were at Davenport, Decorah, and Buchanan County. American Tree Sparrows (13,347) were abundant. Song Sparrows (708) and Swamp Sparrows (191) were both in good numbers. Savannah Sparrows (36) set a new record. The previous high was ten. Lincoln's Sparrows (10), Field Sparrows (8), Harris's Sparrows (285), and White-crowned Sparrows (89) were all in very good numbers. However, White-throated Sparrows (239) and Fox Sparrows (9) had their lowest counts in more than a decade. Dark-eyed Juncos (18,544) were slightly below average. Lapland Longspurs (692) were also below average. Snow Buntings (57) were at their lowest in a decade. Northern Cardinals (6,530) numbers were down somewhat.

It was a good year for icterids. Red-winged Blackbirds (15,466) numbers were the best of the last five years. Meadowlarks (407) were above average. Rusty Blackbirds (204) had their best year in seven. Brewer's Blackbirds (150) set a record high, although they were all in one flock at Canton, SD. Common Grackles (272) and Brown-headed Cowbirds (1,200) were slightly below average.

Purple Finches (376) and House Finches (1,771) were both below average. Common Redpolls (21) were reported from three counts. Pine Siskin (293) and American Goldfinch (5,786) numbers were slightly above average. House Sparrow (22,368) numbers held steady. Eurasian Tree Sparrows (1,878) again set a new record high, something they've done in 4 of the last 5 years. Cedar Rapids had 29 this year, and Amana and Princeton had marked increases from last year.

NOTABLE MISSES

The most notable miss was Northern Goshawk, which had only been missed once in the previous 25 years. Also absent was Gray Catbird, found on 8 of the last 10 counts. Others missed were Black Scoter, American Pipit (5 of last 10), and Great-tailed Grackle (4 of last 10).

UNCOMMON SPECIES

Although we had a large number of unusual birds this year, it will be remembered as the year of the Snowy Owl. Eleven were found on 8 counts, and three others reported count week birds. Spirit Lake had three and Ida County two. The previous high count was five in 1993-94.

A Palm Warbler was found at Davenport and is new to the CBC. An Orange-crowned Warbler was in Illinois on the Green Island count. It wasn't new to the Iowa CBC, but hadn't been reported in more than 25 years.

Six Le Conte's Sparrows were found in two separate locations at Lamoni. They hadn't been on the CBC since 1997-98. A Vesper Sparrow was also at Lamoni. Two Chipping Sparrows were in Missouri on the Keokuk count.

Twenty-one Sandhill Cranes were found on four neighboring Mississippi River counts. Davenport had ten. The previous high count was 12 birds in 2001-02. Other notable finds included a Blue-winged Teal at Rathbun, a Turkey Vulture at Iowa City, a Bonaparte's Gull at Davenport, and a first winter Iceland Gull was a count week bird at Dubuque. White-winged Doves were at Shenandoah for a second straight year, this time as count week birds. Also at Shenandoah was a Marsh Wren. A Yellow-headed Blackbird was at Clinton. Two Red Crossbills were at Muscatine and four were at Buchanan County; Buchanan County also had a White-winged Crossbill.

After being missed last season, Westfield did find a Black-billed Magpie. They have been present on that count in 8 of the last 10 years. But one bird in the last two years is a far cry from the 20 birds found on three counts beginning in 2005-06.

Field Reports—Winter 2011–2012

Francis L. Moore

Francis L. Moore

WFATHER

The entire winter season had above normal temperatures and mild weather with precipitation above normal across much of the state. There were several minor snow events during the period but nothing that came close to being called a blizzard. Overall, it was one of the most pleasant Iowa winters weather-wise.

The first 10 days of December were on the cold side with below zero readings and a -19 degree reading on the 6th at Sheldon being the cold spot. The early cold gave way to above normal temperatures for the remaining 21 days of the month. Lamoni and Leon reached 62 degrees on the 31st. Three large storm systems kept precipitation totals well above normal for much of Iowa. The first event on the 3rd brought snowfall amounts of 3 to 6 inches over the northwest one-third of the state while portions of south central Iowa saw nearly two inches of rain. The

next event brought rain statewide on the 13th and 14th with an average of 0.76 inches. Heaviest rains with the second storm were over portions of southeastern Iowa where more than two inches fell. The final event on the 29th and 30th brought an average of 0.32 inch of rain with the greatest amounts across northern Iowa. Monthly precipitation totals varied from 0.69 inch at Lester to 3.93 inches at Mount Pleasant while snowfall totals varied from only trace amounts at some central Iowa locations to 11.3 inches at Little Sioux.

Mild weather was the rule for most of the month of January with a monthly high temperature of 68 degrees at Sioux City on the 5th and at Shenandoah on the 30th. The persistent warmth resulted in dangerously thin ice cover on lakes and ponds. On the other extreme Elkader and Spencer reported low temperatures of -21 degrees on the 21st; Estherville reported a -30 degree wind chill on the 19th. Snow was more substantial than in December, but still less than normal in most areas. The exception was in northeastern Iowa where some locations received nearly double the usual January snow amounts with Guttenberg reporting the most with 17.5 inches. Totals were far below normal in the southwest where Logan recorded only 0.6 inch of snow. The biggest snow event of the month came on the 20th when amounts of 4 to 7 inches fell over most of the northeast one-half of Iowa. At month's end snow cover was restricted to northeastern and extreme northern Iowa.

Above normal temperatures continued for most of February. The warmest weather

came at the beginning and end of the month with Shenandoah reaching 61 degrees on the 1st and Keokuk and Keosauqua climbing to 62 degrees on the 26th. Sub-zero temperatures were recorded on only three dates (the 11th, 12th and 25th) with Atlantic the cold spot at -13 degrees on the 12th. A series of five storm systems brought most of the month's precipitation. The first event on the 3–4 February affected only the southern one-half of Iowa; it began as rain, but quickly changed to snow with accumulations of 5 to 9 inches. Later storms mostly tracked across northern Iowa and brought welcome relief from severe drought conditions in the northwestern part of the state. The storm of 13–14 February brought snow statewide with greatest amounts in northwestern Iowa where 3 to 5 inch totals were common. The next event on 20–21 February brought mostly rain with amounts to nearly an inch at a few northwestern Iowa locations. Another storm on 23–24 February began as rain but turned to snow statewide with a few northwest and northeast locations seeing more than 6 inches of snow. Finally, the largest precipitation event came on 28–29 February with rain falling statewide. Monthly precipitation totals varied from 0.64 inch at Ionia to 3.26 inches at Bedford.

Temperatures for the three winter months averaged 6.6 degrees above normal while precipitation totaled 1.17 inches above normal. This ranks as the 9th warmest and the 20th wettest winter among 139 years of records. This winter was a huge contrast to recent Iowa winters, and was preceded by five consecutive snowier than normal and four consecutive colder than normal winter seasons.

GENERAL TRENDS

Birding was very good most of the time with mild temperatures and enough snow events to help those that ventured out find some winter visitors from the north. For the most part waterfowl were found throughout the period and had open water to be able to stay north more than usual. Cold temperatures with sub zero readings were recorded for short periods but not long enough to freeze most water enough to make them go south for most of the winter. Almost all species that linger north most winters were found during all three months. Numbers of diving ducks were higher than normal this winter also. There seemed to be larger numbers found after February 15th as they started their northward migrations.

This winter even more American White Pelicans wintered below the dam at Red Rock Reservoir with 75 to 100 staying through the period. Great Blue Herons were again found in higher than normal numbers some away from major rivers. Bald Eagles were found in good numbers in the usual locations. *Accipiters* were fairly easy to find in the vicinity of feeders with above average numbers of Sharp-shinned Hawks found and the usual number of Cooper's again this winter. Rough-legged Hawks were in the state in good numbers and there were higher numbers of Northern Shrike present than in recent years.

This seemed to be a good year to look for gulls with high numbers being found and several rarer birds making an appearance. Snowy Owls outdid themselves this winter requiring a separate report to deal with all of the records. Good numbers of Northern Sawwhet Owls were found as well. One of the major disappointments was the lack of records for the Gallinaceous species. No records outside the Christmas Bird Counts were submitted for Northern Bobwhite, Gray Partridge, Ring-necked Pheasant or Ruffed Grouse. Only 2

records of Wild Turkey were submitted as well. It will take a combination of good weather for nesting in the spring and early summer and milder winters for these populations to recover to more normal numbers.

Red-headed Woodpecker and Sapsucker numbers remain low. With small amounts of snow cover it was difficult to find Lapland Longspurs and Snow Buntings. Numbers of wintering sparrows were higher than usual with the warmer than normal winter temperatures. Winter finches were in decent numbers this winter if one made the road trip to find them.

UNUSUAL SPECIES

It was a fairly active winter for the records committee this season They accepted nine documentations this winter with casual and accidental species reviewed, those being Iceland Gull, Black-legged Kittiwake, Mew Gull, Great Black-backed Gull, Curve-billed Thrasher, Bullock's Oriole and Hoary Redpoll. For gull watchers this made the season at least interesting but not overwhelming for number of species seen and the above normal number of Northern Shrike records also made the winter easier to bear.

COMMENT

Winter birds were in pretty good numbers for the period and with warmer weather it was a good season to be a birder. I again want to thank those that did get out and about and helped to provide material for this report.

It was good to see good detail on some of the rarer species come with the documentations that were submitted. Please continue to provide these details for both rare and for common species on unusual dates. Without this information some species cannot be included in the report and an important species might be left out of the records that should be included, only the person actually seeing the bird can provide such details. Details can be a short brief physical description of the bird that would allow for separation from any similar species. For many species, this can be one short sentence. It doesn't take much to point out the relevant features to give some confidence that the bird was seen well and properly identified. Please take the time make yourself aware of when some of our species are out of season and take short notes to make sure of the record.

If you have internet access and have not tried to submit your reports through the website, please do so. It is easy to enter your records as you encounter them or near the end of the season. Remember, if you don't enter your report into the website, the field reports editors have to do it for you, and the time it takes one person to enter several people's reports becomes substantial very quickly. I again want to thank Tom Schilke of Waterloo for helping to enter those records that were submitted by either email or by sending them to me via another paper method.

SPECIES DATA

ALL CAPS = Casual or Accidental. * = documented, ph = photo. County names are in italics. Full names of contributors are at the end of the article. Abbreviations

used: **ad** = adult, **CBC** = Christmas bird count, **imm** = immature, **juv** = juvenile, **L** = lake, **L&D** = lock and dam, **m.ob**. = many observers, **NWR** = national wildlife refuge, **P** = park, **RA** = recreation area, **Res**

= reservoir, R = river, SP = state park, WA = wildlife area.

Greater White-fronted Goose: Largest numbers overwintering was 21 on 31 Jan at Diehl Wetlands Warren (JS) and 16 on 16 Feb at Saylorville Res Polk (SJD). The first large numbers of migrants were 400 on 18 Feb at Diehl Wetlands Warren (JS) with high counts of 3,690 on 25 Feb at Saylorville Res Polk (SJD), and 2,500 on 26 Feb at Jester Park Polk (BE).

Snow Goose: Small numbers were found in all three months with 3,000 on 2 Feb at Forney L *Fremont* (KDy) starting a somewhat early migration.

Ross's Goose: A total of 15 was found on 9 different days throughout the period with the largest number being 6 on 28 Jan at sand pits near Morningstar Airport *Polk* (AB).

Cackling Goose: Higher than normal temperatures seems to have resulted in greater than normal numbers of this species being seen throughout the period with no fewer than 14 reports above 100 individuals. High: 400 on 28 Jan at sand pits near Morningstar Airport *Polk* (AB) and 346 on 2 Feb at Saylorville Res *Polk* (SJD).

Canada Goose: Flocks of 1,000 to 10,500 were fairly common throughout the period at various locations around the state. The largest mid-winter concentrations were 9,000 on 17 Dec to 27 Feb at Port Neal Ponds *Woodbury* (TLu) and 7,200 2 Feb at Saylorville Res *Polk* (SJD).

Mute Swan: 3 ad on 8-10 Dec at Sand Lake WA *Johnson* (JLF,CRE), 1 on 22 Dec at Hawkeye WA *Johnson* (JLF), 1 ad on 8-16 Jan at Johnston Gravel Pits *Polk* (SJD,AB,JG),1 free-flying ad on 3-18 Feb at Hallett's Quarry *Polk* (JG, RA, JB), and 1 on 8 Feb at West Branch Sewage Ponds *Cedar* (CRE) were the only records.

Trumpeter Swan: Reported from 17 counties again this year. Numbers at Beemer's Pond *Hamilton* through the winter: 229 on 24 Dec, 210 on 22 Jan, 88 on 8 Feb (SJD). High counts at other locations were 12 on 5 Dec at Maffitt Res *Polk* (JG), 46 on 14 Jan at Maffitt Res *Polk* (JG), and 38 on 1 Feb Smith L *Kossuth* (MCK).

Tundra Swan: All: 3 ad 21 Dec-7 Jan at Beemer's Pond *Hamilton* (SJD, JG), 1 ad on 29 Dec-2 Jan at West Okoboji L *Dickinson* (SJD, LAS), and 1 ad at Hallett's Quarry *Polk* (JG, JB, AB).

Wood Duck: Late migrants were 3 on 9 Dec at Bay's Branch WA *Guthrie* (RLC), spring migration began with 1 male and 1 female on 26 Feb at L Ahquabi SP *Warren* (JS) and 4 on 28 Feb at Anderson L *Hamilton* (SJD).

Gadwall: Up to 4 1-31 Dec through 5-7 Jan at Ada Hayden P Story (WO) lingered this fall, a high of 34 on 28 Jan were found in Allamakee (DK). Spring migration seemed to start with 2 on 17 Feb again in Allamakee (DK) and 9 on 19 Feb at Little Wall L Hamilton (SJD).

American Wigeon: All: 2 males on 8 Jan at Maffitt Res *Dallas* (JG), 1 on 26 Feb at Sand L WA *Marshall* (MP), and 1 female on 26 Feb at New L *Woodbury* (BFH).

American Black Duck: All but one record was from east and central Iowa again this season. High numbers were: 8 on 11 Dec on a farm pond in *Clinton* (CRE), 13 on 16 Jan at Red Rock Res *Marion* (SJD), and 3 on 19 Jan at Polk City WA *Polk* (BE).

Mallard: The highest number reported was 6,750 at Red Rock Res Marion on 26 Feb (SJD). Other large groups were 4,650 on 13 Dec at Red Rock Res Marion (SJD) and 5,000 on 22 Jan at Riverton WA Freemont (KDy).

Northern Shoveler: Highest numbers were 165 on 5 Dec at Slater Sewage Lagoon

Story (SJD) and 10 on 29 Dec at West Okoboji L *Dickinson* (SJD) with migrants showing up with 3 on 14 Feb at Maffitt Res *Dallas* (JG).

Northern Pintail: 10 on 10 Dec at Red Rock Res *Marion* (SJD) were late migrants. Highest number returning was 1,610 26 Feb at Hartford WA *Warren* (SJD), next highest was 1,000 on 26 Feb at Jester P *Polk* (BE).

Green-winged Teal: Fall high was 1,700 on 3 Dec at Red Rock Res *Marion* (SJD). 1-3 individuals were found in 12 counties during Dec, Jan, and Feb with 3 on 22 Feb at Diehl Wetlands *Warren* (JS) being the highest returning migrants.

Canvasback: 32 on 29 Dec at West Okoboji L *Dickinson* (SJD) were late. Highest number was 16,300 on 29 Jan on Pool 19 *Lee* (SJD) again this season. High spring count was 86 on 26 Feb at Jester P *Polk* (BE).

Redhead: 20 on 12 Dec at Saylorville Res *Polk* (WO) was the highest fall count. 14 were present on 28 Jan at Johnston Gravel Pits *Polk* (SJD). Spring migrants began showing up with 4 on 6 Feb at Saylorville Res below dam *Polk* (DTh) with a high of 68 on 23 Feb at Saylorville Res *Polk* (SJD).

Ring-necked Duck: High fall: 127 on 4 Dec at Saylorville Res *Polk* (SJD). Most other records were one or two birds with 206 on 22 Jan at Riverton WA *Fremont* (KDy) and 173 on 29 Jan at Pool 19 *Lee* (SJD) and a high spring count of 48 on 26 Feb at Hartford WA *Warren* (SJD).

Greater Scaup: From 1–6 were reported from Story, Clinton, Dickinson, Marion, Dallas, Scott, Lee and Polk (WO, SJD, CRE, JG, AB, AMJ, JB, WMZ). The greatest number was 20 on 13 Dec at Red Rock Res Marion (SJD), and 77 on 29 Jan at Pool 19 Lee (SJD).

Lesser Scaup: High count: 142 on 29 Feb at Pool 19 *Lee* (SJD). Away from the Mississippi R, high count was 91 on 29 Dec at West Okoboji L *Dickinson* (SJD).

Surf Scoter; All: 1 imm on 2 Dec at Brushy Creek RA *Webster* (SJD), 2 imm on 19 Dec at Pool 19 *Lee* (SJD), and 1 imm on 29 Feb at Pool 19 *Lee* (SJD).

White-winged Scoter: An amazing total of 20 were found in Dec and Jan: 2 on 2 Dec at L&D 13 Clinton (JF), 2 on 7 Dec at LeClaire Scott (WMZ), 1 on Dec 10 at Pool 19 Lee (JLF), 6 on Dec 19 at Pool 19 Lee (SJD), 2 on 24 Dec at Pleasant Creek RA Linn (BSc), 1 on 6-8 Jan at Saylorville Res Polk (SJD, JB, JG, DTh), 1 on 13 Jan at Pool 15 Scott (JF), 1 on 21 Jan at Davenport Scott (JLF), and 4 on 25 Jan at Bettendorf Scott (JF).

Black Scoter: All: 1 on 7 Dec 1 mile north of LeClaire *Scott* (WMZ).

Long-tailed Duck: All: 1 male on 6 Dec at Ada Hayden P Story (WO), 1 female on 9 Dec at Alden Hardin (MP), 1 juv male on 10 Dec at Red Rock Res Marion (SJD), 1 on 10 Dec on Pool 19 Lee (JLF), 1 on 11 Dec at Pool 13 Clinton (CRE), 1 on 16 Dec at Pool 19 Lee (JCe), 4 on 9 Jan at Keokuk, just above the dam Lee (JLF), 4 juv on 9 Jan Pool 19 Lee (JWR), 2 on 11 Jan at Lake Davenport Sailing Club, Davenport Scott (WMZ), 3 ad males and 1 juv on 29 Jan at Pool 19 Lee (SJD), and 1 ad male on 25 Feb at Saylorville Res Polk (SJD).

Bufflehead: 1–4 on 1-8 Dec at Ada Haden P Story (WO, SJD), 1 on 11 Dec at Saylorville Res Polk (AB), a high for the period was 7 on 29 Dec at West Okoboji L Dickinson (SJD), with 1 on 8-16 Jan at the Johnston Gravel Pits Polk (SJD,AB), and 6 on 29 Jan at Pool 19 Lee (SJD).

Common Goldeneye: High counts from Dec were 1181 on 10 Dec and 1416 on 28 Dec both at Red Rock Res *Marion*

(SJD), high counts for Jan were 961 on 8 Jan at Red Rock Res *Marion* (SJD) and 2660 on 29 Jan at Pool 19 *Lee* (SJD) returning migrants along the Missouri showed up with 52 on 21 Feb at Snyder's Bend *Woodbury* (TLu) and 43 on 21 Feb at New L *Woodbury* (TLu).

BARROW'S GOLDENEYE: 1 on 8-16 Dec at Pool 13 *Clinton* (JF) continued from the fall.

Hooded Merganser: High: 153 on 3 Dec at Red Rock Res *Marion* (SJD), Midwinter birds: 5 on 29 Jan at Pool 19 *Lee* (SJD). Highest northbound were 16 on 25 Feb at Saylorville Res *Polk* (SJD).

Common Merganser: High counts: 11,700 on 28 Dec at Red Rock Res Marion (SJD), 11,800 on 8 Jan again at Red Rock Res Marion (SJD). Overwintering birds included over 1,440 on 29 Jan at Pool 19 Lee (SJD). Migrants started on 12 Feb with a high count of 2,120 on 26 Feb at Red Rock Res Marion (SJD).

Red-breasted Merganser: All: 20 on 12 Dec at Saylorville Res *Polk* (WO), 8 on 28 Dec at Red Rock Res *Marion* (SJD), 2 on 29 Dec on West Okoboji L *Dickinson* (SJD), 1–2 on 4-8 Jan at Saylorville Res *Polk* (JG, SJD), and 1 on 29 Jan at Pool 19 *Lee* (SJD).

Ruddy Duck: High: 69 on 2 Dec at Brushy Creek RA Webster (SJD). Midwinter high counts included 52 on 28 Dec at Red Rock Res Marion (SJD), 95 on 29 Dec at West Okoboji L Dickinson (SJD), and 617 on 29 Jan at Pool 19 Lee (SJD).

Northern Bobwhite: None reported. Gray Partridge: None reported.

Ring-necked Pheasant: None reported. **Ruffed Grouse**: None reported.

Wild Turkey: High: 47 on 6 Jan at Camp Dodge *Polk* (JG) and 26 on 18 Feb at Lake Ahquabi SP *Warren* (JS).

Red-throated Loon: 1 on 4-11 Dec at Saylorville Res *Polk* (*SJD ph, JG, AB)

Common Loon: 1–4 were seen on 8 days in Dec at many locations including Red Rock Res Marion (AMJ, SJD, AB), Saylorville Res Polk (SJD, AB), George Wyth SP Black Hawk (WO), Pool 19 Lee (SJD) with a final record on 2 Jan at Red Rock Res Marion (JG).

Pied-billed Grebe: All: 4 on 3 Dec at George Wyth SP *Black Hawk* (WO), 1 on 29 Dec at West Okoboji L *Dickinson* (SJD), and 1 on 14 Jan in *Muscatine* (KMc).

Horned Grebe: All: 8 on 3 Dec at Red Rock Res *Marion* (SJD), 3 on 3 Dec at Saylorville Res *Polk* (AB), 1 on 5 Dec at Saylorville Res *Polk* (SJD), and 1 on 13 Dec at Red Rock Res *Marion* (SJD).

Western Grebe: 1 on 3 Dec at Red Rock Res Marion (SJD)

Double-crested Cormorant: All: 1 on 1 Dec at Ada Hayden P Story (WO), 12 on 10 Dec at Red Rock Res Marion (SJD), and 1 on 28 Dec at Red Rock Res Marion (SJD).

American White Pelican: High: 103 on 28 Dec below the dam at Red Rock Res Marion (SJD). Wintering birds included from 48 to 84 below the dam at Red Rock Res Marion from 10-16 Jan (AMJ, MP, SJD), 2 on 25-28 Jan below the dam at Saylorville Res *Polk* (DK, DTh), and 3 on 29 Jan below the dam at L&D 19 *Lee* (SJD).

Great Blue Heron: High count: 66 on 1 Jan at Waubonsie WA *Fremont* (KDy). Wintering birds included up to 11 throughout Jan at Johnston Gravel Pits *Polk* (AB, BE).

Black-crowned Night-Heron: None reported,

Turkey Vulture: All: 1 found dead (apparently hit by a vehicle along the road) on 11 Dec south of Slater in *Polk* (AB) and 2 on 30 Jan at Montrose *Lee* (JWR).

Bald Eagle: High counts for both the interior and the Mississippi River were again higher than last year with 381 on 13

Jan on the Mississippi R *Scott* (KMc), 495 on 29 Jan in *Lee* (SJD) and 366 on 26 Feb at Red Rock Res *Marion* (SJD).

Northern Harrier: 1–11 were reported in Dec with a high count of 11 on 24 Dec in *Wayne* (AB), a high of 5 was found on 15 Jan in *Clarke* (JG), and 2 was the highest number found on 21 Feb at Luton WMA *Woodbury* (TLu) and 2 on 22 Feb at Diehl Wetlands *Warren* (JS). A total of 45 were found throughout the period in all areas of the state.

Sharp-shinned Hawk: A total of 8 were reported, all from the middle part of the state except 1 from *Scott*.

Cooper's Hawk: 32 were reported for the period with most (21) coming from Ada Hayden Park Story (WO) possibly being the same individual. Other singles were found in Sioux City Woodbury (GLV), Colo Story (MP), Cleves Hardin (MP), Muscatine (KMc), Buckeye Hardin (MP), Brenton Feedlot Dallas (DTh), Humboldt Humboldt (ABl), Ackley Hardin (MP) and Owego Wetlands Woodbury (TLu). This is a species that consistently uses bird feeding stations throughout the state and is underreported, especially in larger cities where bird feeders are more prevalent.

Northern Goshawk: 1 on 24 Dec in *Chickasaw* (CLJ) and 1 on 19 Feb at Maffitt Res *Polk* (*LS).

Red-shouldered Hawk: Again all reports were from known or potential breeding locations. Reports away from eastern lowa were 1 on 26 Feb at Lake Ahquabi SP Warren (JS).

Red-tailed Hawk: 1 Harlan's morph on 10 Dec at Chichaqua WA *Polk* (AB), 1 Harlan's morph on 24 Dec in *Wayne* (AB), 1 juv Harlan's morph on 7 Jan in *Polk* (JG), 1 all white leucistic bird on 8 Jan at Marshalltown *Marshall* (MP), 1 Harlan's morph on 8 Jan at Ada Hayden P *Story* (WO), 1

Harlan's morph on 28 Jan in *O'Brien* (LAS), 1 Harlan's morph on 12 Feb in *Polk* (AB), and 1 rufous western morph on 23 Feb in *Story* (SJD).

Rough-legged Hawk: 26 reports totaling more than 45 birds during the season. High counts: 8 on 24 Dec in *Wayne* (AB) and 7 on 15 Jan in *Clarke* (JG). There was only one report of a dark morph on 4 Feb at Harrier Marsh *Boone* (LGD).

Golden Eagle: All: 1 imm on 14 Dec near Stanhope in *Hamilton* (SJD), 1 imm on 17 Dec at Riverton WA *Fremont* (KDy), 1 on 13 Jan at Wellsburg *Grundy* (MP), and 1 imm on 19 Jan *Allamakee* (DK).

American Kestrel: 52 reports with 15 on 10 Dec in Warren (JS), 12 on 24 Dec in Wayne (AB), and 16 on 15 Jan in Clarke (JG) being the highest daily counts reported.

Merlin: 20 were reported from 15 counties with only 2 from Glendale Cemetery *Polk* this winter (AB). Of those reporting subspecies 6 were *columbarius* race and 6 were the *richardsoni* race.

Peregrine Falcon: All: 1 on 15 Dec–28 Feb in Cedar Rapids Linn (BSc), 1 on 9 Jan in Burlington Des Moines (JWR, JLF), and 1 on 16 Jan in Davenport Scott (JLF, KMc).

Prairie Falcon: 1 on 8 Dec southwest of Owego Wetlands *Woodbury* (GLV).

American Coot: Largest numbers were 446 on 29 Dec at West Okoboji Dickinson (SJD), 19–38 on 8-16 Jan at Johnston Gravel Pits Polk (SJD, DTh, AB). Returning migrants were 1 on 23 Feb at Big Creek L Polk (SJD), 1 on 27 Feb at New L Woodbury (TLu), and 2 on 27 Feb at Brown's L Woodbury (TLu).

Sandhill Crane: All: 2–6 on 3-10 Dec at Riverton WA Fremont (KDy), 3 on 7 Dec at Princeton WA Scott (WMZ), 5 on 25 Feb at Otter Creek Marsh Tama (JF), 2 on 28 Feb at Anderson L Hamilton (SJD), 1 on 28 Feb at Diehl Wetlands Warren (JS).

Killdeer: High: 10 on 29 Jan at Montrose Marsh *Lee* (SJD), returning migrants began on 20 Feb with 1 at Diamond L *Poweshiek* (MP) with highest count of 12 on 26 Feb at Saylorville Res *Polk* (RIA).

Dunlin: 1 juv 3 Dec at Runnells WA *Polk* (SJD, ph)

Wilson's Snipe: All: 1 on 23 Dec at Ames Story (SJD), 2 on 1 Jan in Warren (JS), 1 on 5 Jan on Shellrock R Worth (CRN), 1 on 8 Jan at Red Rock Res Marion (SJD), 6–14 on 9-29 Jan at Montrose Marsh Lee (JWR, JLF, SJD), and 1 on 19 Jan in Winneshiek (DK).

American Woodcock: 3 on 27 Feb in *Jefferson* (DCP).

BLACK-LEGGED KITTIWAKE: 1 ad on 31 Dec-1 Jan at Saylorville Res *Polk* (*AB ph, JG).

Bonaparte's Gull: All: 2–6 on 2-3 Dec at Red Rock Res Marion (LGR, SJD), 1 on 21 Dec at Cedar L Linn (JF), 1–5 on 23-28 Jan on Mississippi at L&D 14/15 Scott (JLF, JF, JG, WMZ), and 1 on 29 Jan at L&D 19 Lee (SJD).

Franklin's Gull: All: 1 on 29 Jan at Pool 19 Lee (SJD), 1 on 21 Feb at Saylorville Res Polk (SJD), 1 on 22 Feb at L&D 14 Scott (RLC), and 1 on 26 Feb at Red Rock Res Marion (SJD)

MEW GULL: 1 on 8 Jan at Red Rock Res *Marion* (*SJD).

Ring-billed Gull: High counts: 5,420 on 3 Dec at Red Rock Res Marion (SJD), 4,180 on 8 Jan at Red Rock Res Marion (SJD), 3,000 on 29 Jan at pool 19 Lee (SJD), and 9,600 on 26 Feb at Red Rock Res Marion (SJD). Spring migrants were noted back on 17 Feb at Ada Hayden P Story (SJD) and Rapp P Page (KDy).

Herring Gull: High counts: 675 on 10 Dec at Red Rock Res *Marion* (SJD), 915 on 8 Jan at Red Rock Res *Marion* (SJD), and 400 on 26 Feb at Red Rock Res *Marion* (SJD).

Lesser Black-backed Gull, Polk, 10 December 2011. Photograph by Stephen J. Dinsmore, Ames, IA.

Thayer's Gull: 1 ad and 3 juv on 3 Dec-12 Jan at Saylorville Res *Polk* (AB, SJD, DTh), 1 ad and 4 juv on 10 Dec-26 Feb at Red Rock Res *Marion* (SJD, AB,JG,), 1 juv on 16 Dec-29 Jan at Pool 19 *Lee* (JCe, SJD), and 1 ad and 1 juv on 26 Jan-11 Feb at L&D 14, L&D15 *Scott* (JLF, KMc, JLF, RLC).

ICELAND GULL: 1 juv on 10-26 Dec at Saylorville Res/Polk County Landfill *Polk* (*SJD ph, AB), 1 juv on 29 Jan at Pool 19 *Lee* (*SJD), 1 ad on 6 Feb at L&D 14 *Scott* (*JF ph), and 1 ad 22 Feb L&D 15 *Scott* (*JF ph).

Lesser Black-backed Gull: All: 1 ad on 3-10 Dec at Saylorville Res *Polk* (SJD), 1 ad on10 Dec-8 Jan at Red Rock Res *Marion* (SJD, JG), 1 on 13-29 Dec at Cedar L *Linn* (JF), 1 on 17 Dec at Coralville Res *Johnson* (JF), 1 on 18 Jan at Ottumwa *Wapello* (JF), 1 ad on 29 Jan at Pool 19 *Lee* (SJD), 1 on 31 Dec-29 Feb at Cedar Lake *Linn* (JF, JLF), 1–4 on 8-11 Feb at L&D 14 *Scott* (JF, RLC), and 4 on 18 Feb north of Iowa City *Johnson* (JLF).

Glaucous Gull: All: 1 on 1-3 Dec at Cedar L Linn (JF), 1 juv on 3 Dec at Red Rock Res Marion (SJD), 2 juv on 3-10 Dec

at in *Polk* (SJD), 1 juv 3-4 Dec at George Wyth SP *Black Hawk* (WO, LGR), 1 juv on 11 Dec at Three Mile L *Union* (AB), 2 on 13-17 Dec at Cedar L *Linn* (JF), 1 juv on 14 Dec at Twelve Mile L *Union* (SJD), 1 on 17-31 Dec at Cedar L *Linn* (JF), 1 juv 18 Dec-12 Jan at Saylorville Res *Polk* (SJD), 1 juv on 8 Jan at Red Rock Res *Marion* (SJD), 1 juv on 9 Jan at Fort Madison Riverfront P *Lee* (JWR, JLF), 1 1st cycle on 13 Jan at Mississippi R *Clinton* (KMc), 1 2nd winter on 18 Jan at Ottumwa *Wapello* (JF), 1 juv on 29 Jan at Pool 19 *Lee* (SJD), and 2-3 juv on 11 Feb at L&D 14 *Scott* (JF, RLC).

GREAT BLACK-BACKED GULL: 1 1st cycle on 9 Jan at Fort Madison Riverfront P *Lee* (*JWR ph, JLF), 1 juv on 26-31 Jan at L&D 14 *Scott* (*JF ph, WMZ, JLF), 1 juv on 9-11 Feb at L&D 14 *Scott* (*JF ph, RLC).

Eurasian Collared-Dove: Highest numbers were 36–47 on 18-26 Dec at Brenton Feedlot *Dallas* (JB, AB), 20 on 5 Feb at Brenton Feedlot *Dallas* (DTh).

White-winged Dove: None reported Mourning Dove: Few were reported. High count: 35 on 28 Jan in Muscatine (KMc).

Eastern Screech-Owl: High: 6 on 2 Jan at Westfield *Plymouth* (BFH).

Great Horned Owl: There were only five reports of 6 individuals of this common species during the period.

Snowy Owl: After 14 fall records, another 138 were counted during the winter months of which 29 were confirmed dead. 91 were found in December, 38 in January, and 10 in February. Owls were recorded in 53 counties, mostly in the west and central. A separate report is being written to document this winter's invasion in Iowa.

Barred Owl: There were only three reports of this common species.

Long-eared Owl: All: 1 on 17 Dec

in *Cerro Gordo* (PH), 2 on 18 Dec at Brenton Arboretum *Dallas* (JB), 2 on 26 Dec at Pleasant Creek *Linn* (BSc), 1 on 4 Jan at Union Grove SP *Tama* (MP), 4 on 8 Jan at Saylorville Res *Polk* (AB), 1 on 10 Jan at Liscomb *Marshall* (MP), 2 on 16 Jan-20 Feb In *Worth* (CRN), 8 on 26 Jan at Hooper WA *Warren* (JS), and 1 on 26 Feb at Saylorville Res-Lincoln Access *Polk* (JG).

Short-eared Owl: 1–3 were reported on 15 dates throughout the period with a high count of 8 on 6 Dec at Owego Wetlands Woodbury (TLu, GLV).

Northern Saw-whet Owl: 14 reports and a total of 21 birds were found throughout the period with the highest number of 3 on 21 Jan at Red Rock Res *Marion* (JS) and 4 on 10 Feb at Moorehead P *Ida* (GLV).

Belted Kingfisher: A total of 18 reports were submitted with 22 individuals with the highest being 4 on 14 Jan in *Scott* (KMc). The northernmost were 1 each on 1 Dec in *Winneshiek* (DK) and *Allamakee* (DK).

Red-headed Woodpecker: There were 10 reports this winter. High: 5 on 10 Jan at Five Ridge Prairie in *Plymouth* (TLu) with most being one to three individuals being reported.

Yellow-bellied Sapsucker: There were only 5 reports of this species this winter with all of the reports coming from the middle third of the state. The high count was 2 on 19 Feb at Pammel Woods *Story* (PDBS).

Northern Flicker: Only 1 report was submitted with 2 found on 2 Jan in *Plymouth* (GLV).

Pileated Woodpecker: A total of 11 reports of 13 individuals, most from the eastern half of the state, but 1 on 17 Feb in *O'Brien* was notable (DK).

Loggerhead Shrike: All: 1 on 3 Dec at Riverton WA Fremont (KDy) and 1 on 14 Dec in Union (SJD).

Northern Shrike, Union, 14 December 2011. Photograph by Stephen J. Dinsmore, Ames, IA.

Northern Shrike: There were an amazing 57 reports this winter scattered over most of the state. The southernmost were 1 on 9 Jan south of Fort Madison *Lee* (JWR, JLF) and 1 on 22 Jan at Riverton WA *Fremont* (KDy).

Horned Lark: High: 300 on 22 Jan in Webster (SJD).

Tufted Titmouse: Only 1 report of 6 was reported on 28 Jan at McHose Park *Boone* (WO).

Red-breasted Nuthatch: 9 reports of this species mostly from the southern half of the state. High: 4 on 7 Jan at Hampton Cemetery *Franklin* (SJD).

Brown Creeper: There were 15 reports with 36 individuals included. The highest numbers were 7 on 18 Dec at Lake Ahquabi SP *Warren* (JS). The northern most record was 2 on 17 Dec in the Shellrock Greenbelt *Cerro Gordo* (CRN).

Carolina Wren: Good numbers were reported this season with a total of 9 reports

of 14 individuals with 1 on 4 Jan at Sioux City *Woodbury* (GLV) north and west of the expected range, Most reports were of 1 or 2 individuals most from the southern and eastern part of the state, the high was 6 on 29 Jan in *Lee* (SJD).

Winter Wren: Non-CBC reports: 1 on 3 Dec at Lake Ahquabi SP *Warren* (JS), 1 on 10 Dec at Burlington *Des Moines* (JLF), 1 on 9 Jan at Burlington *Des Moines* (JWR), 1 on 3 Feb at Forney L *Fremont* (KDy), 1 on 9-15 Feb at Springbrook SP *Guthrie* (DTh, RIA), 1 on 15 Feb at Ledges SP *Boone* (JS), and 1 on 17 Feb in *Lee* (DK).

Golden-crowned Kinglet: All: 2 on 1 Dec at Red Rock Res Marion (AMJ), 2 on 10 Dec at Burlington Des Moines (JLF), 1 on 11 Dec at Eagle Point Clinton (CRE), 2 on 11 Dec at Lake Ahquabi SP Warren (JS), 1 on 18 Dec near Fairfield Jefferson (DCP), 1 on 28 Jan at Lake Ahquabi SP Warren (JS), and 3 on 26 Dec at Red Rock Res Marion (SJD).

Ruby-crowned Kinglet: 1 on 3 Jan at Mill Dam Road *Des Moines* (JWR).

Eastern Bluebird: Moderate numbers were reported across the state. High: 39 on 11 Dec at Three Mile L *Union* (AB), 25 on 4 Dec in *Warren* (JS) and 12 on 10 Jan at Five Ridge Prairie *Plymouth* (TLu).

Townsend's Solitaire: 1 on 4 Dec in Clarke (JS).

Hermit Thrush: All: 1 on 4 Dec in Madison (JS), 1 on 14 Dec at Three Mile L Union (SJD), and 2 on 24 Dec and 14 Jan at Lake Ahquabi SP Warren (JS).

American Robin: Numbers were down this winter with a high of only 320 on 2 Jan at Broken Kettle Grasslands *Plymouth* (TLu) and 186 on 2 Jan at Deer Creek L *Plymouth* (GLV). Only 4 other individuals were reported for the period.

CURVE-BILLED THRASHER: 1 on 5 Feb near Lucas in *Lucas* (*SJD, ph) continued from the fall season.

Cedar Waxwing: Highest numbers were: 373 on 14 Dec in *Union* (SJD) and 120 on 18 Dec at Hawkeye WA *Johnson* (MHB).

Lapland Longspur; Highest numbers were 5,000 on 27 Feb in *Woodbury* (TLu), 425 on 22 Jan in *Kossuth* (SJD), 400 on 7 Dec in *Woodbury* (GLV) and 400 on 22 Jan in *Webster* (SJD).

Snow Bunting: Largest flocks for the period were: 45 on 21 Jan in *Boone* (JG) and 22 on 22 Jan in *Kossuth* (SJD).

Yellow-rumped Warbler: 12 records reported: Highest: 5 on 10 Dec Elk Rock SP Marion (SJD), 2 on 18 Dec at Hawkeye WA Johnson (MHB), 2 on 16 Jan at Elk Rock SP Marion (MP), and 2 on 25 Feb at Maffitt Res Dallas (AB).

Pine Warbler: 1 on 18 Feb at the residence of Ellen Bell Ridgeway Winneshiek (*EMB, ph),

Spotted Towhee: All: 2 on 17 Dec at Riverton WA *Fremont* (KDy) and 1 on 22 Jan-1 Feb at Cardinal Marsh *Winneshiek* (EMB, ph).

Eastern Towhee: All: 1 on 7 Dec at Owego Wetlands Woodbury (GLV), 1 on 24 Dec at Riverton WA Fremont (KDy), and 1 on 8 Jan at Saylorville Res Polk (DTh).

American Tree Sparrow: Only 1 report of 100 on 15 Feb at Owego Wetlands *Woodbury* (GLV).

Chipping Sparrow: 1 on 10-28 Feb in Algona *Kossuth* (MCK).

Field Sparrow: 1 on 14 Dec at Three Mile L *Union* (S]D).

Vesper Sparrow: 1 on 7 Jan in *Frank-lin* (SJD).

Savannah Sparrow: 1 on 22 Jan at Sparks Cemetery area *Boone* (LGD) and 1 on 26 Feb at Snyder's Bed *Woodbury* (BFH).

Le Conte's Sparrow: 1 on 12 Feb at Jester P *Polk* (*BE).

Fox Sparrow: 1 on 17 Dec at Brown's

L Woodbury (BFH) and on 18 Feb in Greene (SJD).

Song Sparrow: 1 or 2 individuals found throughout the period from *Jefferson*, *Kossuth*, *Monona*, *Polk*, Story and *Woodbury*.

Lincoln's Sparrow: 1 on 17 Dec at Red Rock L *Marion* (SJD) and 1 on 18 Dec in *Polk* (SJD, ph).

Swamp Sparrow: High count: 9 on 22 Jan at Riverton WA *Fremont* (KDy).

White-throated Sparrow: High count: 12 on 26 Feb in Warren (JS). Only 3 additional records were reported in Harrison, Polk and Winneshiek.

Harris's Sparrow: 16 Records mostly in the southern half of the state: Highest count: 14 on 2 Jan in *Polk* (SJD), 8 on 2 Jan at Broken Kettle Grasslands *Plymouth* (TLu), and 6 on 25 Feb in *Polk* (AB).

White-crowned Sparrow: 16 records in the southern or eastern portions of the state: Highest counts: 33 on 22 Jan at Riverton WA *Fremont* (KDy) and 17 on 6 Dec at Red Rock L *Marion* (SJD).

Dark-eyed Junco: 1 Oregon on 24 Jan at Ames *Story* (SJD).

Rose-breasted Grosbeak: 2 on 16 Feb at feeder of Charlotte and Jerry Goodlaxen in Emmetsburg *Palo Alto* (LAS) apparently over-wintered there.

Red-winged Blackbird: Highest count was 5,000 on 29 Feb in *Polk* (JG).

Western Meadowlark: 2 heard on 25 Feb in *Polk* (RLC).

meadowlark, sp. Highest numbers: 30 on 17 Dec in *Woodbury* (BFH), 30 on 10 Jan at Owego Wetlands *Woodbury* (GLV), 9 on 28 Jan at in *Marshall* (MP), and 6 on 7 Feb in *Polk* (DTh).

Yellow-headed Blackbird: 1 on 20 Dec at Sabula *Jackson* (*Pam Steinhaus).

Rusty Blackbird: High count: 56 on 24 Dec at Riverton WA Fremont (KDy) and 120 on 2 Jan at Broken Kettle Grasslands

White-winged Crossbill, Kennedy Memorial P, Webster, 29 January 2012. Photograph by Mark Brown, Iowa City, IA.

Plymouth (TLu). From 1–12 were reported from eight other counties.

Brewer's Blackbird: 1 ad male on 12 Jan at the Curt Nelson farm *Cerro Gordo* (CRN, good details). Always remember that winter reports require details or photos.

Common Grackle: only 1–5 were reported with a high of on 5 Dec at Ottosen *Humboldt* (JN).

Great-tailed Grackle: 54 on 24 Dec at I-29 and US Hwy 34 *Mills* (KDy).

Brown-headed Cowbird: High count: 38 on 15 Jan at a feed lot in *Clarke* (JG).

BULLOCK'S ORIOLE: 1 from 29 Jan-20 Feb at the home of Gail Masinda in Ottumwa *Wapello* (*CRE, DTh, RIA).

Purple Finch: Only 9 reports. High counts: 40 on 28 Jan at Lake Ahquabi SP *Warren* (JS) and 14 on 9 Feb Big Creek L *Polk* (SJD).

House Finch: Only 1 report of 10 on 14 Jan at Humboldt *Humboldt* (ABI).

Red Crossbill: All: 3 on 2 Dec at Brushy Creek RA Webster (SJD), 5 on 24 Dec at Springdale Cemetery Clinton (JF), 1 probable type 3 male on 8 Jan at Riverside Cemetery Clay (LAS), and 1–2 on 21-24 Jan at Fairmont Cemetery Scott (JLF, WMZ).

White-winged Crossbill: 22 reports with up to 100 individuals the first being 2 on 9 Jan at Squaw Creek P Linn (JF) with many varied locations, mostly from the northern and western part of the state. The highest totals were 40 on 19 Jan at Algona Kossuth (MCK), 75 on 28 Jan at Hartley Cemetery

Common Redpoll, F. W. Kent Park, Johnson, 30 January 2012. Photograph by Jean Allgood, Iowa City, IA.

O'Brien (LAS), 40 on 21 Feb at Sioux City Woodbury (GLV), 40 on 21 Feb at Graceland Cemetery Woodbury (BFH), 100 on 22 Feb at Graceland Cemetery Woodbury (TLu), and 80 on 29 Feb at Lincoln Hwy (E41) bridge on the Des Moines R Boone (DCH). It seems that this winter was a good year for crossbills in the state.

Common Redpoll: Common Redpolls are usually hard to find in Iowa but this year there were 27 reports submitted. They included high numbers of 11 on 8 Jan at Johnston Gravel Pits *Polk* (SJD), 11 on 8 Jan at Riverside Cemetery *Clay* (LAS), 12 on 14 Jan at Headquarters Segment *Hardin* (MP), 30 on 28 Jan at Kennedy Memorial P *Webster* (MHB), 17 on 2 Feb at Plymouth

Cemetery *Cerro Gordo* (CRN), 33 on 11 Feb at Story Lake Cemetery *Buena Vista* (LAS), 17 on 18 Feb at Sibley Cemetery *Osceola* (LAS), and 20 on 18 Dec in *Warren* (JS).

HOARY REDPOLL: 1 on 11 Feb at Storm Lake Cemetery *Buena Vista* (*LAS).

Pine Siskin: 13 reports. Highest counts: Up to 28 on 1 Dec-29 Feb at Fairmont Cemetary *Scott* (WMZ), up to 15 on 10 Dec-29 Feb at Sioux City *Woodbury* (GLV), and 13 on 18 Feb in *Webster* (SJD).

American Goldfinch: High count: 8 on 30 Jan in Humboldt *Humboldt* (ABl).

Eurasian Tree Sparrow: All: 8 on 2 Dec in Buffalo *Scott* (WMZ), 19 on 17 Dec in Cedar Rapids *Linn* (BSc), and 3 on 9 Jan at Green Bay Bottoms *Lee* (JWR).

Bullock's Oriole in Wapello County

Gail Masinda

Even though I live in Ottumwa, my backyard is large and includes a wooded area that opens onto a rayine. In my home, the best seat in the house for birding is in my music studio. The room is small, but faces the backyard and is completely windowed on three sides. In late November 2011, at dusk, I was playing the piano and my husband was listening. When I stopped playing at the end of the song, instead of commenting on the music, he just nodded his head toward the window and asked, "What's that?" I didn't know, but the flash of orange-yellow told me it was something I had never seen before. It was too dark to see clearly or to take photographs. Looking through our field guides, I considered a Bullock's Oriole, but thought it was highly unlikely given our location and the time of year. I was disappointed I couldn't get photos because I presumed I would never see the bird again. I was wrong. When I saw the bird again a few days later on 26 November 2011, I had a camera nearby. Those first pictures weren't great, but certainly good enough to help identify the bird. The bird's size, medium length, tapered bill, and vivid orange and black coloration were clearly the features of an oriole. The orange supercilium, black eye stripe, narrow black bib, and bold white patch on the secondary coverts identified the bird as a male Bullock's Oriole. The head pattern and extent of white in the wings were sufficient to eliminate the similar Baltimore Oriole or a hybrid between these two species.

The Bullock's Oriole preferred the suet feeder, but also foraged for seeds on the ground. At different times, I offered him the traditional orange sections and grape jelly fare, but he never seemed interested. He clearly preferred the suet. After seeing him every day or two for the first few weeks, I was concerned when over a week went by with no sighting. When he did finally return, all of his tail feathers were missing. He was tail-less, but otherwise appeared healthy and active. Over the next several weeks new tail feathers eventually appeared.

The Bullock's Oriole remained a regular visitor at our feeders through at least 21 March 2012. Bullock's Oriole is a rare visitor to Iowa with just four previous state records. Notably, one was present from 4 November 1999 to 25 March 2000 at a feeding station in Elk Horn in Shelby County (*Iowa Bird Life* 70:43, 100, 141).

208 West Golf Avenue, Ottumwa, IA 52501 (gail.masinda@yahoo.com)

Curve-billed Thrasher in Lucas County

Paul D. B. Skrade and Stephen J. Dinsmore

In early February 2012 Paul Skrade was contacted about an unusual bird frequenting a yard near Lucas in Lucas County. A low quality photo suggested the bird was possibly a Curve-billed Thrasher. Paul obtained permission for a quick visit to the yard on 5 February 2012 by the authors and Corey Lange to confirm the identification and photograph the bird. At the end of our visit we requested permission to publicize the sighting, but the landowners declined and did not want other visitors. Ironically, the bird was not seen again after our visit.

When we arrived a little after 7:30 A.M., we met with the landowners and they showed us the areas where the bird had been seen. We proceeded to walk the hedgerows around the house without locating the bird. We continued to a nearby brushy ravine where the bird had been seen and quickly found it at 8:15 A.M. on the ground under a dense patch of cedars. We watched and photographed the bird here for almost 30 minutes and then returned to the house. As we were about to depart, the bird suddenly appeared in the yard and we watched it for another 45 minutes before we left at 9:25 A.M. Initially, the bird was quite secretive and remained in the center of the cedar thicket, often hidden behind branches. Later, in the yard, the bird perched in the open a few feet off the ground and was also seen scratching in leaves and snow at the base of a clump of foxtail.

The thrasher was a medium-sized bird with a plump body, very similar in body size to an American Robin. It lacked a tail, which the landowners said had disappeared the previous week, perhaps due to a cat attack. The bird was easily recognizable as a Curve-billed Thrasher. The bill was black, roughly equal to the length of the head, rather thin, and evenly decurved to a sharp tip. The eye was yellow with a black iris. The bird's upperparts were a cold, gray-brown color without any distinct markings. The upperwings were the same color as the upperparts with a prominent thin white bar along the tips of the greater secondary coverts and a less extensive white bar along the tips of the median secondary coverts. The throat and underparts were off-white with distinct darker brownish-gray mottling on the upper breast that gradually faded on the flanks and belly. The undertail coverts were white with a faint hint of buff color. The legs and feet appeared dark-colored. On the basis of the grayer upperparts and white (not buffy) upperwing coverts we concluded that the bird was an adult. Furthermore, the prominent white wing bars and distinct breast spotting indicate the bird was of the more easterly subspecies *T. c. curvirostre*, the expected subspecies in the Midwest. Thae homeowner indicated the bird had been present since at least 14 November 2011.

This represents the fifth record of a Curve-billed Thrasher in Iowa. There is no clear pattern of occurrence in Iowa with records from all seasons. However, two individuals were present in the winter of 1980-81, one from late September 1980-31 January 1981 at Rathbun Res, Appanoose Co. and the other from 17 November 1980-February 1981 at Solon, Johnson Co. (Newlon, M. C. 1981. Curve-billed Thrashers in Iowa. *Iowa Bird Life* 51:21-24).

Fifty Years Ago in Iowa Bird Life

James J. Dinsmore

The June 1962 issue led off with a short article by David Trauger describing the first American Wigeon nest known from Iowa. Found in June 1961 at Union Slough National Wildlife Refuge, the nest contained eight eggs but eventually was destroyed by a predator.

The longest article was the report on the organization's fortieth annual convention held in May 1962 at Cedar Falls. A total of 161 people registered for the meeting, probably one of the largest meetings the organization has ever held. The organization's membership for 1961-62 was listed as 366 members. The Sunday field trips reported finding a record 169 species and an additional 13 were seen on Saturday. Rock Pigeon was not considered countable at the time, and several species that are now considered almost automatic finds (Canada Goose, Wild Turkey, Eurasian Collared-Dove, House Finch) had not yet become part of lowa's regular avifauna.

A letter from newly elected I.O.U. President Dean Roosa encouraged members to find an activity in the organization where they could become involved. He ended by encouraging members to attend the upcoming fall meeting at Ledges State Park.

The field notes for spring 1962 included a good assortment of reports, indicating gradual growth of this feature. Of some interest were several reports of both Bohemian Waxwings and Evening Grosbeaks. The previous issue of *Iowa Bird Life* covering the winter season had indicated that there had been an invasion of both of these boreal species so these reports indicated that some had lingered into spring.

Iowa Ornithologists' Union Business Meeting

19 May 2012

The IOU spring general membership business meeting was held at Montgomery Hall, Johnson County Fairgrounds, Iowa City, Iowa. President Paul Roisen called the meeting to order at 4:20 p.m. Also in attendance were Tom Schilke, vice president; Cathy Konrad, secretary; Doug Hunt, treasurer; board members Jay Gilliam, Don Brown, Keith Dyche, Karen Viste-Sparkman, Dennis Thompson; and members of the organization.

Update on board business since the fall meeting: President Paul Roisen reported board actions taken through e-mail communications. The Projects Committee requested \$3,000 additional funds for worthy projects. This will be taken out of memorial funds. Paul Roisen announced new committee appointments: Rick Hollis and Paul Skrade for membership committee and Candace Havely for projects committee.

Secretary's Report: Cathy Konrad reported that minutes from the fall 2011 business meeting were published *IBL* 81(3):161-162 and budget meeting minutes were *IBL* 81(4), 193-194. Minutes accepted.

Treasurer's Report: Doug Hunt reported that the total checking, savings and CD balance as of 30 April 2012 is \$61,045.43. This balance is down from the same time last year due to the additional \$3,000 allocated to projects. An audit will be conducted this October.

Membership Coordinator's Report: Pam Allen reported there are 21 new members this year but the organization is losing some members due to non-renewals. Ideas for recruitment can be submitted to Doug Harr and the membership committee. Online renewal is greatly appreciated, even if renewal check is then sent by mail. This facilitates record keeping.

COMMITTEE REPORTS

Publications: Ann Johnson reported that Tom Kent has recently completed a 125 page manuscript based on Paul Bartsch's 1899 master's thesis on pre-1900 Iowa bird citations. This historical reference has been published privately by Tom and is available to members while the supplies last for \$25. Tom has designated the IOU Publications Enhancement Fund to receive all proceeds from the sales. The first issue of Iowa Bird Life for 2012 has gone to press this week. Beginning with the next issue, members who have indicated willingness to save postage and read IOU News on-line will not be mailed a copy. Ann asked members to watch the listsery for an announcement of when it has been published. Ann asked members to be sure and submit any time-sensitive material to newsletter editor John Bissell several weeks before it needs to be published. Images used in the newsletter must be high quality jpegs or tiff files to have the resolution necessary for printing.

John is always looking for members' ideas and articles. With regard to electronic publications, Ann report the Listserv has 856 current subscribers. Ann has now made it possible for subscribers to change their own settings such as for temporary suspension due to vacation etc. Ann is seeking member volunteers to help with Listsery administration. Management of the IOU Facebook page has been turned over to the membership committee to use as a recruitment tool. Lastly, Ann reported website upgrade to new technology which allows for distributive maintenance. All members can take some ownership and help in maintaining a vibrant content. A user guide is available on the site which gives details. Some changes include dynamic membership reports, financial reports including a graph over time, on-line board actions, membership directory, IBL online for the past two years, county checklist information, gazetteer to local birding hotspots, and a photograph sharing site. The organization thanked Ann for her continued work in making the IOU website such an excellent resource.

Records: Ann Johnson reported that Jay Gilliam replaces Steve Dinsmore on the committee for a six-year term beginning 1 January 2012. Records are current through the winter season. The committee appreciates on-line documentations. Continue to document rarities through the committee as posts to the listsery are not permanent. Ann reminded the membership that a documentation review is not a vote on the credibility of the birder but simply whether or not a sighting was described with enough pertinent details that future birders can be confident that the identification was correct. Ann also reminded the membership that logging in prior to entering documentation provides the person with the document as well

as the committee vote and comments. The committee is working with others to make the contributions of Iowa birders meaningful to other entities, such as sharing data on threatened and endangered species with the Iowa DNR state ecologist.

Membership: Doug Harr reported that the committee is continuing to work on advertising the presence of the IOU through display boards. The organization had previously approved the purchase of three additional display boards with a travel bag. The committee would like members who live in the eastern and western counties in the State to volunteer to take these boards and display them at local birding and conservation events. The committee is still developing the information to be placed on the boards. Rick Hollis stated that he has noted that IOU has a lower membership based on percentage of state citizens compared to other states and is looking into why members join and why they leave.

Library/Historical: Hank Zaletel provided a written report detailing the work his committee continues to do regarding copying all postings on the IOU Listserv pertaining to the IOU, people, and related events. Hank also reported that many news articles from 1980-2000 were deposited in the ISU archives. These articles pertained to birds, people, and related events. A complete set of IOU News has been assembled and will be scanned for electronic access. Bids from potential vendors will be sought. This project should be complete and online in six months. Paul Roisen notified membership that money for this project has been approved by the board and will come from Ann Barker memorial money.

Projects: Due to 13 applications and

\$28,000 in requests, the committee ranked the requests and requested an additional \$3.000. Three requests were fully funded and the rest were partially funded. Paul Roisen thanked Keith Dyche for his four years of service on the committee. Projects and grant funding are as follows: an environmental education raptor pen for Woodbury CCB (\$500), heterospecific attraction in nest site selection research with Courtney Duchardt at University of Illinois at Champaign-Urbana (\$500), a bird identification kit for teachers with Iowa CCB (\$500), Hitchcock Hawkwatch raptor banding with Pottawattamie CCB (\$1,000). Cerulean Warbler research in Yellow River Forest with National Audubon Society (\$1,000), a hawk trapping station for the Iowa Wildlife Center (\$500), binoculars for Iowa Young Birders (\$1,500), the 2013 Keokuk Bald Eagle Days with Lee CCB (\$500), and a Chimney Swift tower for Friends of Jackson CCB (\$500).

OLD BUSINESS

Next meeting: The fall meeting will be held in Marshalltown 24-26 August 2012. Tom Schilke and Mark Proescholdt are making plans for events related to this weekend.

NEW BUSINESS

The spring 2013 meeting will be held 3-5 May 2013 in Waterloo.

President Paul Roisen asked if members would be interested in talking to him about ways to partner with other environmental organizations and increase the presence of IOU on grants, signage, and other events to contact him.

Items from the membership: Bob Cecil once again organized a book silent auc-

tion and urged members to bid on items; all proceeds go to publications committee. Bob's son John will be taking over the auction. The organization thanked Bob for his efforts in transporting books and other auction items to and from the yearly meetings.

Karen Disbrow brought up a concern over the extensive tree and scrub habitat removal at Cone Marsh by the DNR. Although the removal was of non-native species, the pines had been a roosting site for Long-eared owls. Ann Johnson reminded membership that this points out more than ever the importance of reporting significant seasonal sightings, rarities, and threatened and endangered species so this information is available to others.

Shane Patterson brought up the topic of the Southern Wings Program and their Latin American education and land acquisition activities. State agencies can help support their efforts. The Iowa DNR, Iowa Audubon, and American Bird Conservancy are some of the agencies that have offered support. No specific action taken but membership voiced general support for the Southern Wings Program.

Doug Harr is working with Joe Wikinson regarding the Alaska pipeline project to help the Bureau of Land Management make decisions to best preserve waterfowl and shorebird habitat. A letter has been drafted on behalf of IOU. Members can use this standard letter to write on behalf of IOU.

Carl Bendorf thanked IOU on behalf of Iowa Young Birders for the grant to help get this organization get off the ground. Ross Silcock is chairing the board of directors for this organization, which plans to recruit young birders and have field trips across the state. The membership is \$10 and the schedule is available on the IOU website.

Election of new officers: Mark Proescholdt, John Rutenbeck, and Sharon Stilwell comprised the nominating committee. The slate of candidates consisted of the following: Treasurer: Mary Beth Hunt; Secretary: Stuart Sparkman; and three board members for regular terms: Jay Gilliam, Dennis Thompson, and Karen Viste-Sparkman. President Roisen asked for nominations from the floor. With no additional nominations received, the candidates were declared elected by acclamation.

New members: Thirty first time attendees were at the meeting. These individuals were introduced and welcomed. Vice President Tom Schilke presented each with the book *Birds in Iowa*.

Walter Stephenson moved that the meeting by adjourned. Motion seconded. Motion carried and meeting adjourned at 5:20 P.M.

Respectfully submitted, Cathy Konrad, secretary

Iowa Ornithologists' Union Board Meeting

19 May 2012

The IOU spring board meeting was held at Montgomery Hall, Johnson County Fairgrounds, Iowa City, Iowa. President Paul Roisen called the meeting to order at 1:20 P.M. Also in attendance were Tom Schilke, vice-president; Cathy Konrad, secretary; Doug Hunt, treasurer; board members Jay Gilliam, Don Brown, Keith Dyche, Karen Viste-Sparkman and Dennis Thompson; committee chairs Ann Johnson, Hank Zaletel and Doug Harr; and newsletter editor John Bissell.

Board of Directors action since the fall meeting: President Paul Roisen reported actions taken through e-mail communications. The Projects Committee requested \$3,000 in additional funds due to increased applications from worthy projects. This was moved by Don Brown and seconded by Karen Viste-Sparkman. Passed by 6-0 vote.

Secretary's Report: Cathy Konrad reported that the minutes of the 2011 fall board meeting were published in *IBL* 81(3):163-164 and budget meeting min-

utes were published in *IBL* 81(4):193-194. No additions or corrections were offered. Minutes stand approved.

Treasurer's Report: Doug Hunt reported that the total checking, savings and CD assets are \$61,045.43. This balance is down from the same time last year due to the additional \$3,000 allocated to projects. Discussion ensued regarding where the \$3,000 additional projects money should come from. It was decided to take \$100 from the Kent fund, \$100 from the Brown

fund, and \$2,800 from the Ann Barker fund. An audit will be conducted this fall.

Membership Coordinator's Report: Pam Allen reported 21 new memberships so far this year; 41 members from last year have not yet renewed. Ann Johnson offered ideas to increase memberships such as advertising in county conservation board newsletters and contacting the 279 individuals who have accounts on the IOU Listserv.

COMMITTEE REPORTS

Library: Hank Zaletel requested board approval to use money from the Ann Barker memorial fund to pay the cost of scanning copies of the *IOU News* from 1985-2010, which could then be accessed through the web site. Motion made by Don Brown to approve and seconded by Jay Gilliam. Motion carried.

Newsletter: Ann Johnson reported that members can receive their newsletter in either print or electronic format. Ann and newsletter editor John Bissell are coordinating the list of member preferences so all members are receiving a print version for now.

Conservation: Paul Roisen asked board members to consider additional conservation initiatives, perhaps partnering with other organizations for land acquisition. This sparked additional discussion on how to prioritize funding for land acquisition, research, and service projects.

Nominating Committee: Nominating committee consisted of Mark Proescholdt, John Rutenbeck, and Sharon Stilwell. A slate of officers was presented to the Board: Treasurer: Mary Beth Hunt; Secretary: Stuart Sparkman; and three board members for

regular terms: Jay Gilliam, Dennis Thompson, and Karen Viste-Sparkman.

OLD BUSINESS

Next meeting: The fall meeting will be in Marshalltown on 24-26 August 2012.

NEW BUSINESS

Spring 2013 IOU meeting: The spring IOU meeting will be in Waterloo on 3-5 May 2013.

Committee appointment approvals: Paul Roisen announced that Rick Hollis and Paul Skrade have been recommended for Membership Committee. Moved by Jay Gilliam and seconded by Dennis Thompson. Motion carried. Candace Havely has been recommended for Projects Committee. Moved by Tom Schilke and seconded by Karen Viste-Sparkman. Motion carried.

Future board meeting times: Paul Roisen asked for board input into meeting times. Discussion ensued regarding finding time for both meetings and allowing the board time for socialization and birding. Members agreed to the need to make sure board meeting times are available to the general membership. Options might be Friday night, early Saturday evening, or a conference call prior to each meeting. Further discussion recommended keeping board business timely and limiting time to only topics that require board action.

New and better website: (due to time constraints, this action took place following the general business meeting from 5:20-5:25 P.M.): Ann Johnson distributed booklets she prepared called "Board of Directors User Guide. A guide for conducting IOU Board Business online". This booklet ac-

companies the many changes and improvements Ann has made to the IOU website, making an excellent website even better. Ann has made changes facilitating a more decentralized approach to web management. Officers and board members will be able to make limited changes to the web site in an effort to better facilitate communication and conduct business.

Meeting was adjourned at 1:55 P.M.

Respectfully submitted, Cathy Konrad, secretary ANNUAL MEMBERSHIP DUES (renewable yearly): Fledgling (students) \$15, Institutional \$45, Foreign \$35, Goldfinch \$30, Bluebird \$35, Oriole \$50, Egret \$75, Osprey \$100, Bald Eagle \$250, and Peregrine Falcon \$500+. Membership dues entitle members to receive *Iowa Bird Life* and *IOU News* quarterly and to vote and hold office in the Union, Contributions are tax deductible to the extent allowed by law. Join, give a gift, or manage your membership on-line at <www.iowabirds.org>. Paper forms for new members and renewals may be mailed to the treasurer (see inside front cover). Back issues of *Iowa Bird Life* are available from Membership Coordinator Pam Allen, 7955 Wistful Vista Dr., #20, West Des Moines, IA 50266 (2birders@hickorytech.net).

INSTRUCTIONS TO AUTHORS: Original manuscripts, notes, letters (indicate if for publication), editorials, and other material relating to birds in Iowa should be sent by e-mail attachment in Microsoft Word to editor. Research manuscripts should include abstract, introduction, study area, methods, results, discussion, and literature cited sections and will be sent for peer review. Accepted manuscripts will be published promptly depending on space available.

Photos and graphics: Submit only original, unsized, and unenhanced photos in your camera's JPEG (*.jpg) format. Photos must be 300 dpi at the size they will be printed (6-1/2" wide by 6-1/2" high for the cover and various smaller sizes inside), so setting your camera to its highest possible resolution is recommended. The editor will do any resizing and enhancing required because any previous adjustments to the photos may make them unusable. Submit photos and graphics as e-mail attachments.

E-mail all material other than seasonal reports to editor at cootjr@iastate.edu. Deadlines for submission are January 1 for winter issue (Vol. xx[1]), April 1 for spring issue [2], July 1 for summer issue [3], October 1 for fall issue [4]. Send seasonal field reports to field reports editors by deadlines listed on inside front cover.

IOU News Co-editors: John and Anna Bissell, 328 SE Cedarwood Drive, Grimes, IA50111-1143 (John. annabissell@gmail.com)
